

Observability & Recovery Architecture

Micrometer metrics, structured logs, audit logs and runbook-driven admin recovery

- Current scope
- Micrometer counters via Actuator metrics
 - Key-value structured logs
 - Audit log / SQL / Admin API based recovery

Not included: Prometheus/Grafana dashboard or alert rules

Operational Guardrails

Metric tag policy
No eventId / orderId / paymentRequestId
Use low-cardinality result/status/failureCode tags

Log policy
No payload / token / secret / auth header
Use key-value fields for recovery tracing

Current runbook scope
Manual admin recovery guide
No stale PROCESSING auto recovery job

Architecture boundary
No Kafka consumer state transition
No WebClient timeout confirmation flow in this scope
